

Good morning

My name is Don Toedtli & I have a crushed pelvis w/ severed nerves. I'm in chronic & nerve pain in my right leg & pelvis. I have a pain pump surgically implanted that injects Dilaudid directly into my spinal fluid. 4 Percocet 10/650 mg per day. 4 Neurontin 800 mg per day. Under this pain management I was lucky to get 4 hrs of sleep per night & 2 hrs w/o waking & only ate once a day.

Under the pain management w/ the medical marijuana I receive 6 hrs sleep per night & 4-5 hrs w/o waking. Eat 2-4 times a day (full meals).

I have break thru pain during heavy pain seizures that I have never experienced until the medical marijuana program. I thank you all for having this in place. Without this I would be near helpless!!! Again thank you

Repeal is not the answer make it harder for the people abusing the program!
